www.medmart.co.za

In normal times,
which yes there were,
and may never be again,

You worked your magic,
caring for those who came
in need of your healing touch

Just for a few moments
known to them,
yet their life is in your hands

As it surely would,
the stealth killer came
unexpectedly (for most)

Spreading on the wind
from the air we breathe
into the moist flesh

The vulnerable
could not stop
the mass replication

Which ravaged the lungs
the heart
the vessels

Weakened
Breathless
Afraid

They came to you
helpless to fight
against the relentless beast

And, you
also unprepared
also afraid
did not turn away.

Instead, stood firm
for those who needed you
You took care of them
even when
you didn't know how.

Redeploy they said.
There is no one else.
You put yourself in harm's way.

The human form
in front of you
fighting for life

Against some RNA
without a soul
and you with so few weapons

You medicated
ventilated
sometimes not sure how.

The rules changed
every day
every hour

You adapted.
You persevered.
Defeated your fear

Gave the best of care
not enough for some
but for others, survival

Where did it come from in you?
The passion to serve
those you don't even know

Even you may not know
may not question
it is so deeply felt

We who watched
from a distance
in awe
of your competence
your energy
your courage
and for those you saved
and those you did not,
forever grateful.

Jeff Cooper, PhD, Professor of Anaesthesia
at Harvard Medical School

A photograph of three healthcare workers, two women and one man, walking outdoors. They are all wearing white lab coats over their scrubs. The woman on the left is wearing teal scrubs, the man in the middle is wearing teal scrubs, and the woman on the right is wearing blue scrubs. They are all smiling and appear to be in a pleasant conversation. The background is a soft-focus outdoor setting with greenery.

A TRIBUTE TO OUR HEALTH WORKERS

Medmart Health

Medmart Health

Over the past decade, Medmart Health has been building a successful medical supplies business with the aim of becoming integrated across various global economies.

Medmart Health is a South African domiciled company that has been setup as a medical supplier of non-invasive equipment. Our head office is situated in Johannesburg, South Africa with supplementary offices in Durban and Cape Town. We supply medical equipment and solutions to the private and public sectors in Southern Africa through our dedicated sales force and appointed agents. We are positioned to serve both the public and private sector with particular focus on personal protective equipment required in the healthcare industry.

Through our manufacturing division and strategic partnerships with global suppliers and manufacturers, Medmart Health is able to offer turnkey solutions to our clients that hinges on efficient service delivery. Our commitment is to deliver professional service through our team of specialists who have a wealth of experience in the medical industry.

Manufacturing Capacity

Our SABS approved manufacturing facilities focus on hospital grade PPE.

Medmart Health's core mission is to produce high-quality and affordable medical-grade personal protective equipment, ranging from non-woven, spun bound, polypropylene protective wear to biohazard medical waste packaging. We are dedicated to assisting small and large businesses, as well as wholesalers, get access to South African made supplies that they require. Our products are manufactured to the highest standards (SABS approved), offering medical grade protection, comfort and quick turnaround times. This is all supported by affordable factory-direct pricing.

Our product range includes the following products:

- Disposable & reusable coveralls (Type 5/6 & CAT III)
- Disposable & reusable hospital gowns (from AAMI Level 1 to Level 4)
- Disposable plastic aprons, shoe covers and gowns.
- Disposable non-woven shoe covers, mop caps, theatre caps, linen sets and linen savers.
- Disposable biohazard bags and bins
- SHARPS containers for medical waste.

Manufacturing Capacity

BBBEE LEVEL 1

HALYARD

Partnerships

Medmart Health offers superior personal protective equipment through established partnerships with industry leaders.

Since inception, Medmart Health has worked to create relationships with leading manufacturers of PPE in South Africa and globally. This allows us to offer product ranges from industry leaders such as 3M, Halyard, GE Healthcare and Dupont to name a few.

Apart from our general product range, Medmart Health's procurement division works to source new, improved and innovative products in the medical personal protective space both locally and globally. This allows us to remain abreast of technological advancements in the sector. Our objective is to offer a plethora of relevant products to our clients. We have at times sourced particular items as per client's requests. This offering is supported by our capacity to import products from various geographical locations, making Medmart Health an end to end solution.

Contract Manufacturing

Medmart Health has strategic global partners that manufacture on our behalf.

With the increase in demand for medical-grade personal protective equipment due to the Covid-19 pandemic, it has been essential for Medmart Health to broaden its manufacturing capacity, globally. This has allowed us to benefit from regional economies of scale of nations that have key competencies in manufacturing particular products. An example would be the manufacture of electronic medical devices such as infrared thermometers and fingertip pulse oximeters which we outsource to the Far East.

Our clients have benefitted from this as we are able to maintain a level of price stability and consistent supply.

Logistics

Medmart Health offers its logistics network to its clients to ensure a fully integrated trade solution.

An integral component of our business is to ensure efficient transit times of merchandise within our value chain. We maintain a proactive, as opposed to a reactive, approach to timelines of goods in transit; to avoid missing delivery deadlines. This is crucial when dealing with cross border trade and stock movements. Medmart Health has an appointed logistics DevOps department that sets plenaries, books the necessary logistical assets and ensures documentation so that we'll always be on time.

For our bespoke projects, we have access to established logistics partners that have local as well as global footprints. Our aim is to have our products delivered timeously and to the highest degree of quality and service.

Executive Summary

Established in 2016, Medmart Health has focussed over the last five years to become a sustainable international medical supplier engaged predominantly in the supply of personal protective equipment to the SACU region of Africa.

The direction taken by us has led to the development of export markets for our products as well as diversification into different sectors of global and regional economies.

Through our performance and quality of service we were able to capture the business of strategic private and public partners in Southern Africa.

We then focussed on developing our own brand of products under Medmart Health and offered our catalogue directly to retail end users. This market has seen a significant increase since the beginning of the Covid-19 pandemic as the general population became consumers of medical PPE. This resulted in us opening our retail wing through an online store which has grown to consume a considerable share of the South African retail market.

We then set our sights on necessary resources required globally and particularly upon the African continent. This led to the development of our manufacturing divisions and cross-border contract manufacturing partnerships.

Infectious viral diseases such as Covid 19 is now considered amongst one of the fundamental challenges of our times. The rising prices of basic PPE globally is a pressing issue that requires global efforts to drive the world back to safety.

Medmart Health has focussed in on the global undersupply and inflated value of medical-grade PPE. In order to ensure the continuity of supply at affordable prices, we have expanded our investments and enhanced our strategic business partnerships with companies, particularly within the South East Asian region. Constructing the entire value chain will allow us to respond to our market's needs efficiently and with efficacy.

Vision & Mission

Vision

- Supply quality and affordable products, projects and turnkey solutions to local export markets within our business areas.
- Deliver the highest degree of service.
- To become a market leader in medical-grade personal protective equipment.
- Develop emerging markets with key focus on value addition and social beneficitation within the markets in which we do business.
- Maintain the best standard of quality in every aspect of our business.

Mission

Our mission is to provide bespoke, turnkey solutions in our area of business in the form of trade, developmental projects, private public partnerships and joint ventures by building an entire value chain through an in-depth and insightful understanding of our markets. Our research, development and advanced strategies ensure that we are committed to quality, integrity and the preservation of the social, economic and environmental responsibilities that we assume in our markets.

Medmart Health has a global footprint that extends over 12 nations and is continuously increasing. Our business is built upon the foundation of securing strategic partnerships and representation in the markets in which we operate. Through the vision and motivation of our executive, we are forging new frontiers.. What we do has an impact on the world that we live in. That's an important responsibility and great opportunity.

Medmart Health

BBBEE LEVEL 1

The Markets

Supplying Markets (Origin)

Medmart Health abides by all regulations set out by our local and regional markets. We predominantly operate in the SACU region, South East Asia and the Far East in procuring our supply requirements. Our export commodities are shipped via South African ports.

In order to manage our risk, we have developed a network of established representatives within the markets in which we conduct business. Together with having crucial insight into their local market, our representatives add value through their existing relationships and networks. We recognise that in international trade, trust is a factor. We thus select representatives that are honest and have irreproachable characters.

It is imperative that we ensure the supply sustainability of our markets. This requires an approach, which avoids mining the commodity reserves within these markets. This would be detrimental to our longevity by causing spikes in the market price, which would be the cause of concern for protectionist groups within these markets. This is particularly important in the case of nations that are not net exporters. A conservative approach underpins the market's move towards export parity. Our strategy is based on harmonious integration.

Destination Markets

The markets in SACU have made a substantial impact on the business of Medmart Health, with South Africa being paramount to this success. It has been a dependable market with high and consistent demand.

Our focus is now towards Southern to Central Africa

Competitive Advantage

Medmart Health has been using its competitive advantage to address the major obstacles that has slowed down export diversification in the supply markets previously outlined. Supply disruptions, government policies that inhibit trade, price volatility and inability to handle large supply projects have been amongst the major deterrents preventing progression. Below are some of the key competitive advantages of the Group:

Extensive knowledge of the business

- Strong relationships with financial institutions.
- Within the various phases of the business, key personnel fill crucial roles. The executive have carefully selected these individuals based on their expertise and experience in the industry. The amalgamation of strategy and competency is our backbone for success.
- We have a full understanding of the commodities we trade, our brands and demand preferences of our importers.
- Integrated logistics network for turnkey solutions.
- Continuous research into product development and new opportunities.

Extensive network within export and import markets

- We have established exclusive contracts with import partners.
- Strong relationships in private and public sectors within our markets.
- Proximity to procurement markets.

Risk mitigation and reduction

- Strategic relations with core vendors and business partners.
- Full knowledge of regulation and protocol requirements in exporting and importing nations.
- Accurate planning and scheduling.
- Fully insured operation.

Economic And Market Analysis

Because excellence defines our aspirations.

The Economic and Market Analysis Centre (EMAC) is Medmart Health's focal point for market research and economic analyses. Established to address the increasing importance of economic and market trends, EMAC supports our projects by providing insight into economic factors, government policies and commercial forecasts. The centre merges our extensive technical expertise with market research, business and economic analysis
